Brand new professional DPF cleaning service launched by Ivor Searle

Eco-friendly service utilises state-of-the-art Flash Cleaning technology

Ivor Searle's fast turnaround professional DPF cleaning service offers a low-cost alternative to component replacement.

Ivor Searle has launched a professional diesel particulate filter (DPF) cleaning service for cars and light commercial vehicles.

The new service expands Ivor Searle's existing portfolio of remanufactured engines, cylinder heads, gearboxes and turbochargers, and aims to provide customers with a single source of supply for high quality automotive products.

Utilising state-of-the-art Flash Cleaning technology, the environmentally-friendly water-based process delivers as new levels of cleanliness by removing all soot deposits, including PM10 particles, cerium oxide deposits and oil residues, from the DPF.

Analysis by Umicore, one of the world's foremost automotive DPF and catalyst manufacturers, has confirmed that there are no remarkable differences between a DPF cleaned using the same technology employed by Ivor Searle and installing a brand new unit.

Ivor Searle's fast turnaround professional DPF cleaning service offers independent workshops competitive advantage by offering a low-cost alternative to component replacement.

To guarantee peace of mind, all Ivor Searle professionally cleaned DPFs are provided with a detailed inspection report and are covered by a no quibble 12-month unlimited mileage warranty.
